SUPER-FAST RUNNING ACTUATORS

SAFETY AND FAST PROTECTION

Gruner super-fast running actuators deliver operational reliability in tough environments: they can help to control volume flows in laboratories, cleanrooms and fume hoods.
Gruner are energy-efficient and safe. They provide information on preventive maintenance and can maintain communication links for up to 2 minutes when there is an interruption in the power supply.

NEW DEVELOPMENTS

ENERGY-EFFICIENT AND SAFE

The super-fast running actuators developed by Gruner are energy-efficient and safe. They provide information on preventive maintenance and can maintain communication links for up to 2 minutes when there is an interruption in the power supply.
